Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 March 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3-7 and 9-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Barton et al. (3,451,288).

Barton et al. discloses an assembly unit for a motor vehicle, the assembly unit comprising a bearing block (12) having mounts each with an inner diameter, a bolt with an outer diameter less than or equal to said inner diameter, and a lever arm arrangement (10), having a pedal, arranged in said bearing block pivotably around an axis of said bolt fixed in multilayer bearing elements (44,46) that are positioned on said mounts, said bearing block having a section expanding in case of an accident so that the bolt disengages from said mounts as a consequence of the acting force deforming said section. Barton et al. further discloses a two-part bolt (28,48) having an elastic snap connection area on which individual bolt parts are engaged with one another in a positive-locking and nonpositive manner and not made in one piece with said bearing block. Barton et al. further teaches the first bolt part having a slotted end with hook shaped areas (see fig. 2) having tapering sections facing another bolt part (28) which has an engaging contour, behind which extend said hook-shaped areas of said first bolt part.

Allowable Subject Matter

3. Claims 8 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. Claims 22-26 are allowed.

Response to Arguments

5. Applicant's arguments filed 3/17/04 regarding claims 1 and 9 have been fully considered but they are not persuasive. Applicant argues that Barton does not disclose a bearing block structure that deforms in the even of an accident. Although Barton does not explicitly disclose this feature, it is inherent that the force produced by a collision would at the very least deform the bearing block structure of Barton et al. and cause the bolt to disengage.

Conclusion

6. This is an RCE of applicant's earlier Application No. 10/089256. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 3682

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
